

TOMLAB /CONOPT is a MATLAB solution based on CONOPT®, a solver for large-scale nonlinear optimization (NLP) developed and maintained by ARKI. CONOPT® has been under continuous development for over 25 years. TOMLAB /CONOPT is available for 32/64-bit Windows and Linux.

CONOPT is a feasible path solver based on the old proven GRG method with many newer extensions. CONOPT has been designed to be efficient and reliable for a broad class of models. The original GRG method helps achieve reliability and speed for models with a large degree of nonlinearity, i.e. difficult models, and CONOPT is often preferable for very nonlinear models and for models where feasibility is difficult to achieve.

For more information about TOMLAB /CONOPT see the [TOMLAB /CONOPT User's Guide](#).

Tomlab Optimization Inc.

1260 SE Bishop Blvd Ste E, Pullman, WA 99163-5451, USA
Tel: +1 (509) 320-4213, Fax: +1 (619) 245-2476
Email: us@tomopt.com, <http://tomopt.com>

Tomlab Optimization AB

Västerås Tech Park, Trefasgatan 4, SE-721 30 Västerås, Sweden
Tel: +46 (21) 118118, Fax: +1 (619) 245-2476
